# Call for Papers 2025

Year	Submissions	Accepted	Invited (among accepted)	Accept. Rate
2025	49	32	4	65%

# Call for Papers 2024 vs 23, 22

Year	Submissions	Accepted	Invited (among accepted)	Accept. Rate
2025	49	32	4 (12,5%)	65%
2024	39	30	2 (6.66%)	76.9%
2023	45	25	2 (8.00%)	55.5%
2022	39	27	5 (18.5%)	69.2%

## Remarks:

- **6 workshops** this year (9 submitted) vs 9/11 in 2024
- **All talks are reviewed**, no sponsored talk
- **Hybrid model**: CFP + a low number of invited talks

# Attendees

# Attendees

# Rough Budget

**2025 global budget: ~13.600€ (2024: 14.000€)**

- **47% Catering**
- **23% Speakers Reimbursement**
- **16% Goodies**
- **11% General (servers, bank,...)**

# Open data

**Figures, Collabs and history** are **openly available**:

Acceptation rate & invited talks figures

Year (IRL editions)	Submissions	Accepted	Invited talks among accepted ones	Acceptation Rate
2023	45	25	3 (12%)	55.5%
2022	39	27	5 (18.5%)	69.2%
2019	46	35	3 (12.0%)	76.0%
2018	37	29	4 (14.0%)	78.3%

# Open data

Also **analysis** are **openly available**:

The screenshot shows the 'Conference content' page of the Pass the SALT 2023 website. It includes a navigation bar with links like 'About', 'Schedule', 'Slides', 'Videos', 'Practical', 'Report', 'Sponsors', 'CoC', and 'Archives'. The main content area provides details about the event at Lille Polytech, listing 22 talks, 3 workshops, and 1 keynote. It also features a table for 'Speakers geographical distribution' and a table for 'Streaming' data.

**Conference content**

The event took place at the Lille Polytech engineering school from the 3rd to 5th of July, 2023.

- **22 talks** (35-min or 20-min long - 22 in 2022) ;
- **3 workshops** (5 in 2022) with in particular a great success among the attendees of the Scapy workshop ;
- **New: 1 keynote and 1 closing talk.** 2023 is the second year in a row we have a keynote, with the addition of a closing talk this year. We are really pleased with this because it is not so obvious for such a small event like Pass the SALT to set up these ones ;

**Speakers geographical distribution:**

- France : 74% (77% in 2022)
- Europe: 22% (23%)
- Rest of the world: 4% (0%)

**Streaming:**

Talks have been **streamed all along the 3 days**.

Average watching duration per connection: **25 min**. It matches approximately with the duration of a talk. It means that people are using the streaming to attend the talk they want. It is another way to attend PTS and we are **happy** to reach such attendees figures.

	Monday	Tuesday	Wednesday
Number of online connections	152	159	80

**Video recordings:**

Videos of the talks [have been put online](#) each evening. It almost can be seen as a normal/boring thing but if you look around at others conferences, even far bigger and professionally organized ones, videos publishing can often be really delayed! We are very proud of this very fast publishing 🚀 only being possible due to hard work from our video team and video partners 🍷

A yearly online report  
(late summer) with:

- all the figures
- in depth analysis and feedback
