- How does it works?
- Community Driven Development
- Future is bright!
- Questions

# Who are we?

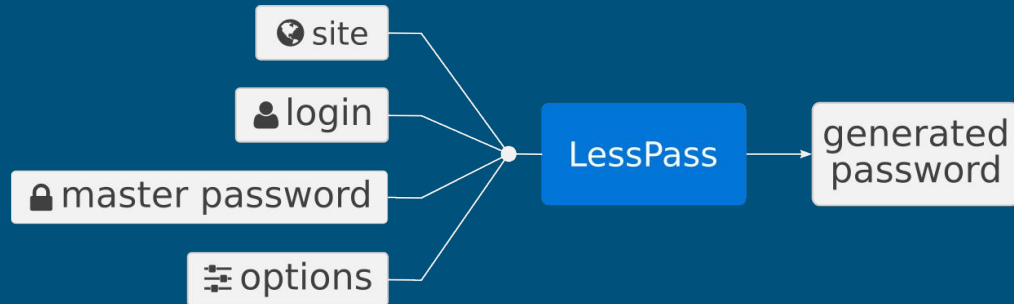

# What is LessPass?

---

LessPass computes a **unique password** using a site, login and a master password.

You **don't need to sync** a password vault across every device because LessPass works offline!

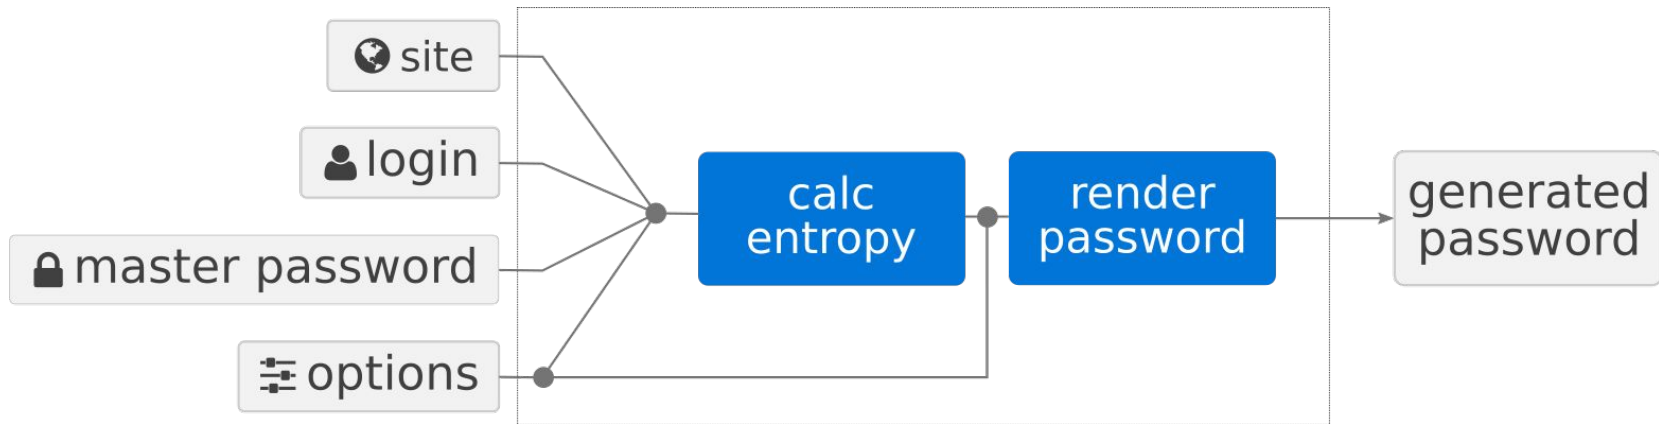

# demo

If the gods of the demo are with us

# How does it works?

---

# How does it works?

Chars to add: m03

# How does it works?

---

- Insert string pseudo randomly *m03* in *lfK6bUhqrGODR*

$$1.1975630628246246e^{48} \setminus 13 = 9.212023560189422e^{46} + 5$$

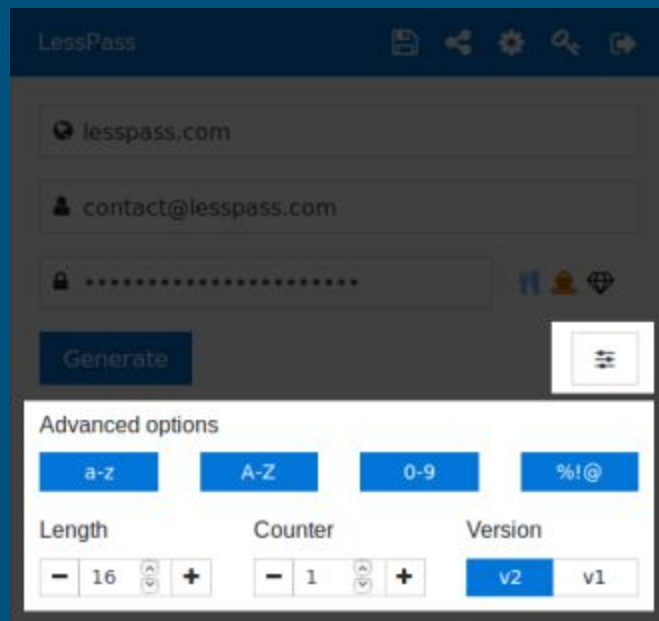

lfK6b + m + UhqrGODR

$$9.212023560189422e^{46} \setminus 14 = 6.58001682870673e^{45} + 0$$

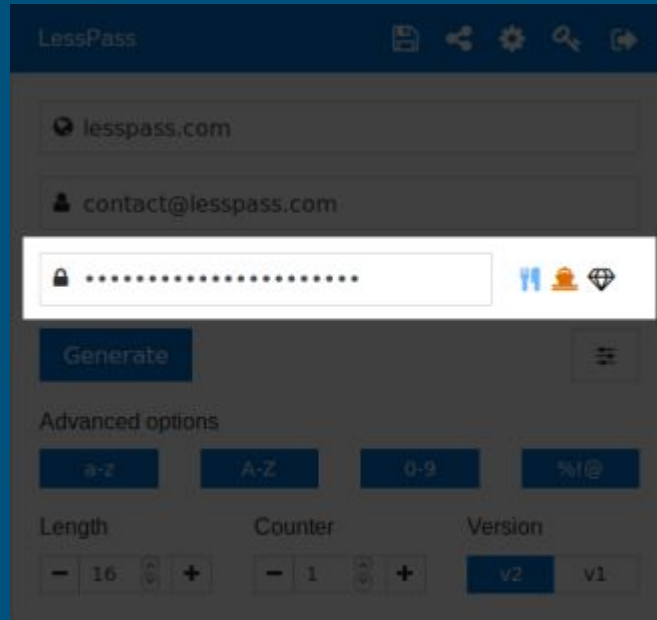

0 + lfK6bmUhqrGODR

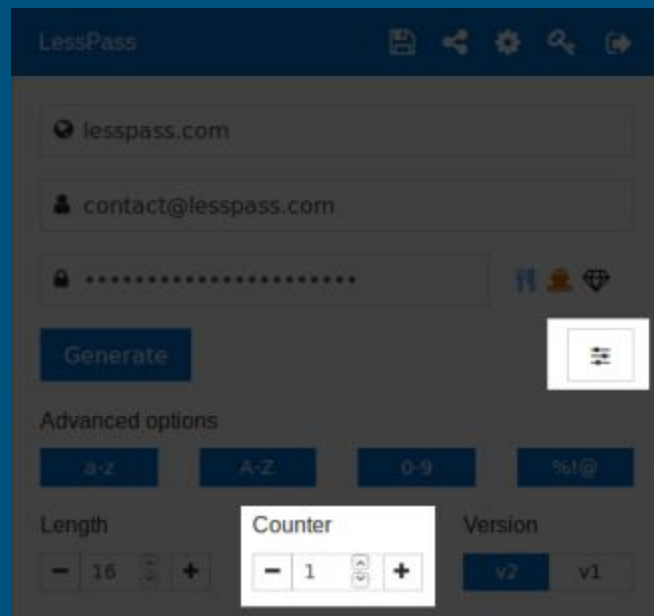

$$6.58001682870673e^{45} \setminus 15 = 4.386677885804486e^{44} + 5$$

0lfK6 + 3 + bmUhqrGODR

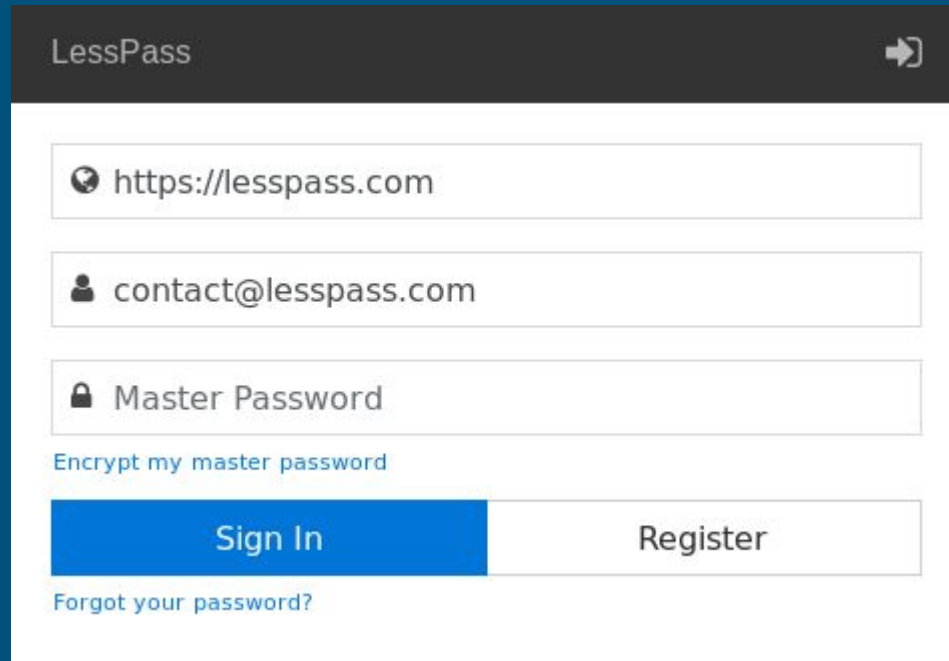

"Eating on a boat is expensive".

# What about stupid rules?

The image shows a screenshot of the LessPass website's login and registration interface. At the top, there is a dark header with the text "LessPass" on the left and a right-pointing arrow icon on the right. Below the header are three input fields: the first contains a globe icon and the URL "https://lesspass.com"; the second contains a person icon and the email address "contact@lesspass.com"; the third contains a lock icon and the text "Master Password". Below these fields is a link that says "Encrypt my master password". At the bottom, there are two buttons: a blue "Sign In" button and a white "Register" button. Below the buttons is a link that says "Forgot your password?".

# Architecture

---

The image features the JavaScript logo, which consists of the letters 'J' and 'S' in a bold, black, sans-serif font. The 'J' and 'S' are positioned side-by-side, with the 'J' on the left and the 'S' on the right. They are centered within a bright yellow square. This yellow square is set against a solid blue background that covers the entire slide.
